Mercury Shredder RSM1130 Micro Cut

2102407

Overview

Small office shredders in a choice of security options
Unique Mercury anti-jam technology prevents paper jams

Description

Protect your confidential and valuable information from being stolen by shredding any documents that may put your business at risk from identity fraud. The Rexel Mercury RSM1130 small office shredder is an ideal space saving desk side model and has a S4 security level which means that it shreds paper into unreadable, super small confetti style particles (sized 1.9 x 15mm) making it ideal for highly sensitive data.

Paper jams in a shredder are time consuming, frustrating, messy and sometimes costly. With the RSM1130 shredder, paper jams are a thing of the past. Featuring the revolutionary Mercury jam free technology, the RSM1130 has a unique brightly lit indicator that warns you whether you are trying to feed too much paper into the shredder in one go. A red light indicates too much paper and the green light means there is no risk of jamming.

The RSM1130 is an ultra quiet, general use shredder that can shred up to 12 sheets of 70gsm paper in a

continuous single feed. Specifically designed for regular shredding of highly confidential documents, it features a 30 litre large capacity waste bin that holds up to 310 sheets of 70gsm paper. The front opening waste bin enables simple and mess free emptying and the shredder cuts off automatically when the bin is full. The RSM1130 goes into power saving mode after 2 minutes of non use, reducing any unnecessary power usage and making it an ideal choice for the environmentally friendly office. Recycling is encouraged with the use of optional waste paper sacks. With a clear, easy to use LED control panel, the stylish RSM1130 is a great choice for an office worker who requires maximum security levels when shredding.

Weighing 14.676kg and sized at 570(H) x 420(W) x 320(D)mm, the RSM1130 comes with the extra peace of mind of a 2 year warranty, an extended warranty on the cutters plus it is compliant with finger safe international standards and is TUV and CE compliant.

Features

- Auto cut out when bin open
